ABOUT THE APP

- An interactive online platform that facilitates the communication of all links in the supply chain
- Minimizes administration, automates routine activities and is available 24/7 from anywhere
- Maximizes the flow of goods with minimal costs and efficiently utilizes transport capacity
- Ensures direct control over transportation capacity
- Helps plan, measure, and evaluate human resource performance on reception and shipping

BASIC PARAMETERS

- The cloud application minimizes acquisition costs
- Rapid deployment in business processes will help save costs from the day one
- Intuitive controls ensure user satisfaction
- Use the standard application or a solution optimized to suit your needs
- Advanced reporting in the form of .xls files, graphs in the application, or connection to Power BI ensures maximum information and evaluation in real time
- API connectivity enables two-way communication between Time Slot Control and the customer's internal system

ti:me® SLOT CONTROL CITY
